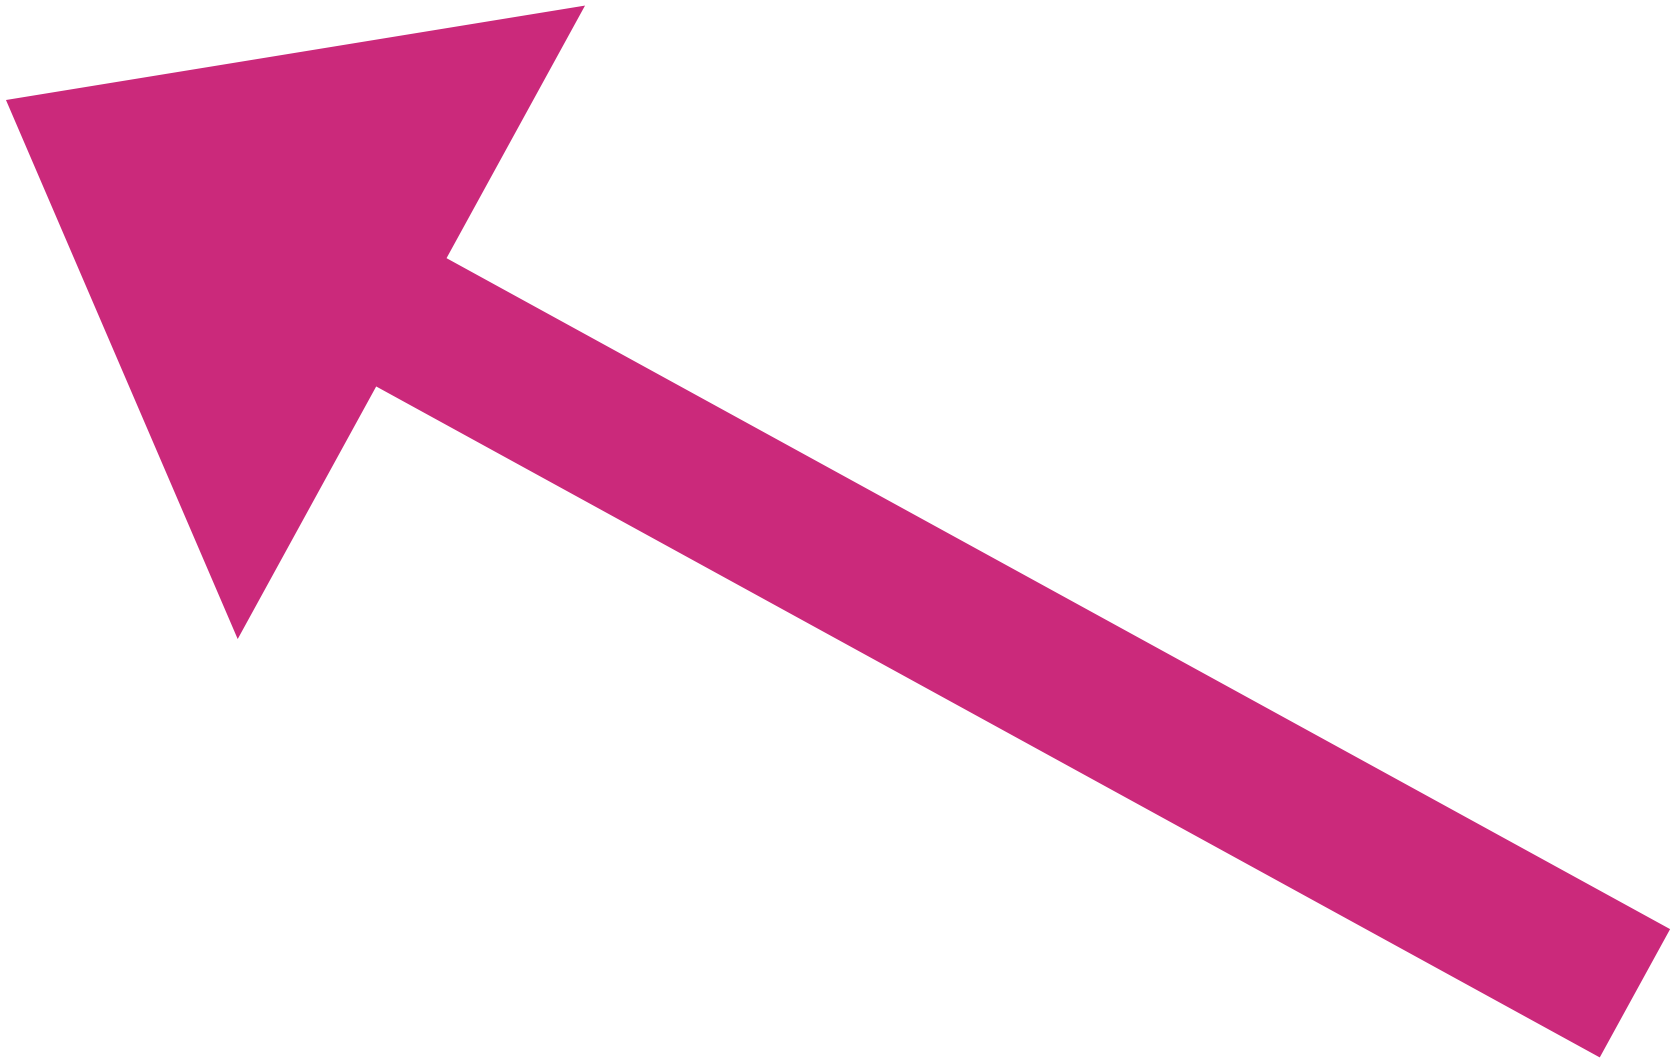
```
if (condition) {
    do_something
}
```

If Statement

```
age <- 24
if (age >= 21) {
   print("Cheers")
}
```

Condition has to evaluate to *single* TRUE or FALSE value



If Statement

```
if (condition) {
   do_something
}

age <- 24
if (age >= 21) {
   print("Cheers")
}
```

If-Else Statement

```
if (condition) {
   do_something
} else {
   do_something_else
}
```
