

Exercice

```
fahr_to_kelvin <- function(temp) {  
  kelvin <- ((temp - 32) * (5 / 9)) + 273.15  
  return(kelvin)  
}
```

Write `kelvin_to_fahr` to reverse the above function

Test your function by calling `fahr_to_kelvin`, then
`kelvin_to_fahr`

Exercise

```
fahr_to_kelvin <- function(temp) {  
  kelvin <- ((temp - 32) * (5 / 9)) + 273.15  
  return(kelvin)  
}
```

Write `kelvin_to_fahr` to reverse the above function

Test your function by calling `fahr_to_kelvin`, then
`kelvin_to_fahr`

If Statement

```
if (condition) {  
    do_something  
}
```
