

DataFrame Indexing

<code>iris\$Species</code>	Species column, as a vector
<code>iris[,c("Species")]</code>	Species column, as a vector
<code>iris[,c("Species", "Petal.Width")]</code>	Species and Petal.Width columns, as a data.frame
<code>iris["10",]</code>	row named "10", as a data.frame
<code>iris["Species"]</code>	Species column, as a data.frame

Data Frame Indexing

<code>iris\$Species</code>	Species column, as a vector
<code>iris[,c("Species")]</code>	Species column, as a vector
<code>iris[,c("Species", "Petal.Width")]</code>	Species and Petal.Width columns, as a data.frame
<code>iris["10",]</code>	row named "10", as a data.frame
 <code>iris["Species"]</code>	Species column, as a data.frame
