

Exercise

```
x <- 20:30
```

Replace the prime numbers (23, 29) with NA by

- 1) subsetting
- 2) using recode

Hints:

- 1) Remember the `%in%` operator?
- 2) `recode(x, "c(primes here) = NA")`

01:00

01:00

Exercise

```
x <- 20:30
```

Replace the prime numbers (23, 29) with NA by

- 1) subsetting
- 2) using recode

Hints:

- 1) Remember the `%in%` operator?
- 2) `recode(x, "c(primes here) = NA")`

```
x <- 20:30
```

```
x[x %in% c(23, 29)] <- NA
```

```
x <- recode(x, "c(23, 29)=NA")
```
