

Receding Variables

is function: coming in next section!

Recoding Variables

`ifelse` function: coming in next section!

Exercise

```
x <- 20:30
```

Replace the prime numbers (23, 29) with NA by

- 1) subsetting
- 2) using recode

Hints:

- 1) Remember the `%in%` operator?
- 2) `recode(x, "c(primes here) = NA")`
