

Subset

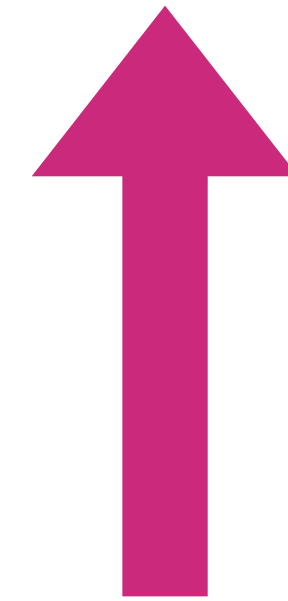

subset(safi, select=-instanceID)

negative sign to exclude

# Subset

```
subset(safi, select=-instanceID)
```

negative sign to exclude

# Exercise

Read in the SAFI data again (exercise A)

Using `subset`, select the column `respondent_wall_type` for just the rows where the village is God

Select rows where `no_membrs` is  $> 2$  and  $< 5$

Exclude rows from the data where `years_liv`  $< 5$

Find the 1 room houses made of burntbricks. Select just these two columns and the village.
