

Dropping Columns

# Resave the data frame without the columns

```
safi <- safi[, -match("instanceID", names(safi))]
```

```
> match("instanceID", names(safi))
```

```
[1] 14
```

saffi<-saffi[!names(saffi)%in%c("instanceID")]

# Dropping Columns

Resave the data frame without the columns

```
safi <- safi[, -match("instanceID", names(safi))]
```

```
> match("instanceID", names(safi))
```

```
[1] 14
```

```
safi <- safi[, !names(safi) %in% c("instanceID")]
```

# Subset

Subset for selecting rows or columns

```
subset(data.frame,  
       subset=condition for rows to keep,  
       select=columns to keep)
```

Don't have to quote variable names or prefix with name of the data frame
