

Dates: lubridate

Get and set components

`year()`, `month()`, `wday()`, `mday()`, `hour()`, ...

```
bday <- dmy("14/10/1979")
```

```
month(bday)
```

```
[1] 10
```

```
wday(bday, label = TRUE)
```

```
[1] Sun
```

```
Levels: Sun < Mon < Tue < Wed < Thu < Fri < Sat
```

Exercise

Use the lubridate package

Create a variable with your birthday

`today ()` gets you the current date

Subtract your birthday from `today ()` to see how many days old you are
