Data Types

- logical: `TRUE` or `FALSE`
- integer
- numeric aka double: real, decimal
- complex: example `2+5i`
- character: `"text data"` - single or double quotes
  - use `paste()` to concatenate (join)
- `typeof()` to check type

Vectors

```r
x <- 1:5
x <- c(1, 2, 3, 4, 5)
x <- c("apple", "banana")
x <- c(TRUE, FALSE, TRUE)
```
