Use the lubridate package

Create a variable with your birthday

`today()` gets you the current date

Subtract your birthday from `today()` to see how many days old you are

01:00

01:00

01:00

Exercise

Use the lubridate package

Create a variable with your birthday
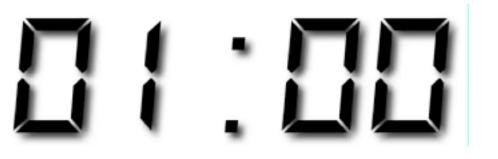

`today()` gets you the current date

Subtract your birthday from `today()` to see how many days old you are

Sorting

```
> x <- c(3,6,2,3)
> sort(x)
[1] 2 3 3 6
> order(x)
[1] 3 1 4 2
> x[order(x)]
[1] 2 3 3 6
```
